

Your motivation and attitudes (*1=not at all true of me ... 7=very true of me*)

1 2 3 4 5 6 7 n/a

I am very interested in the content area of this lecture.

○ ○ ○ ○ ○ ○ ○ ○

I am certain I can master the skills being taught in this lecture.

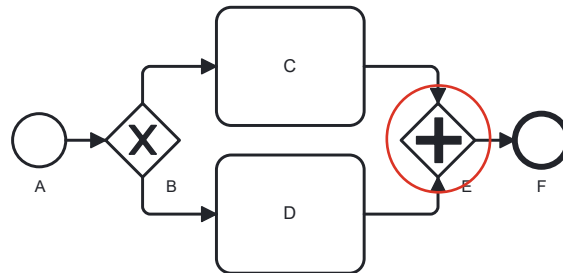

○ ○ ○ ○ ○ ○ ○ ○

I am confident I can understand the most complex material presented in this lecture.

○ ○ ○ ○ ○ ○ ○ ○

I am confident I can understand the basic concepts taught in this lecture.

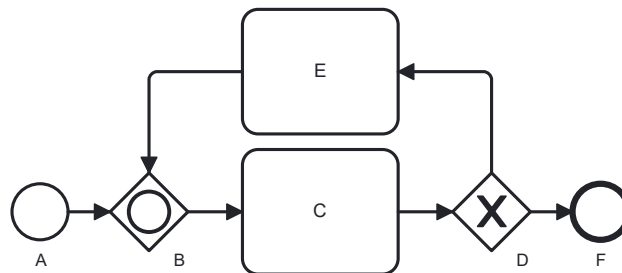

○ ○ ○ ○ ○ ○ ○ ○

A potential deadlock in AND-join E.
There is no triggering flow on any path from A to E.

○ This process model is sound.

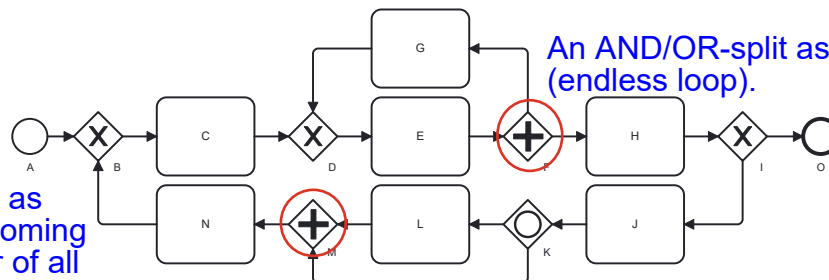

○ No answer

An OR-join as loop entry is allowed.

☒ This process model is sound.

○ No answer

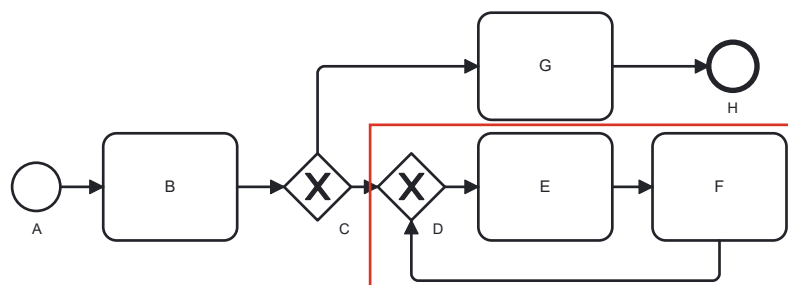

A potential deadlock as K hinders that its incoming flow (J,K) is a trigger of all incoming flows of M.

An AND/OR-split as loop exit is not allowed (endless loop).

○ This process model is sound.

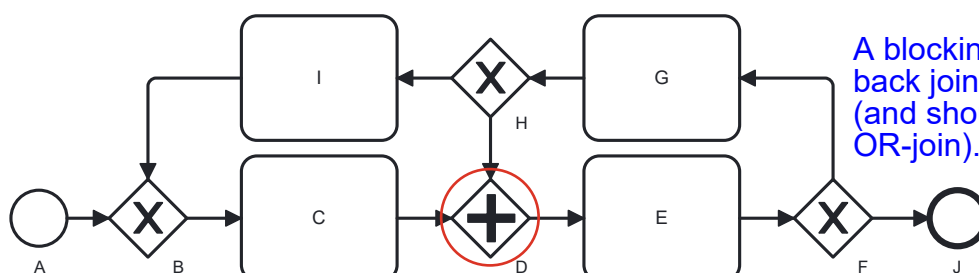

○ No answer

A livelock (this loop has no exit).

○ This process model is sound.

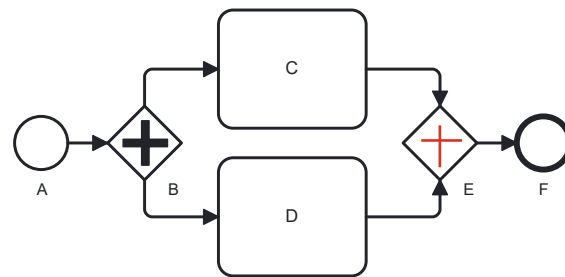

○ No answer

A blocking loop since this back join D is an AND-join (and should be an XOR or OR-join).

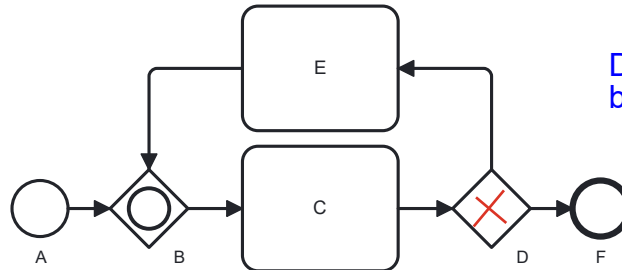

○ This process model is sound.

○ No answer

E is an intersection point of B. Thus, it must be an AND- or OR-join.

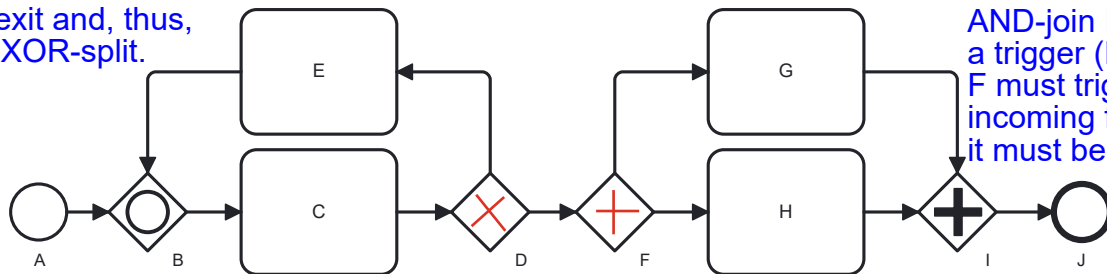

☐ No answer

D is a loop exit and, thus, must be an XOR-split.

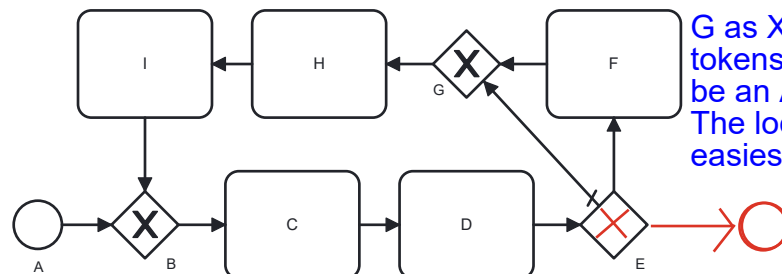

☐ No answer

D is a loop exit and, thus, must be an XOR-split.

AND-join I requires a trigger (D,F). Thus, F must trigger all incoming flows of I - it must be an AND-split.

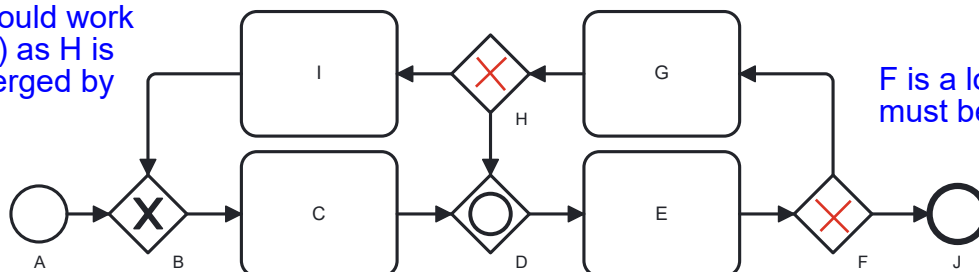

☐ No answer

G as XOR-join merges all tokens of E, thus, E cannot be an AND- or OR-split. The loop has no exit. The easiest way out is at E.

☐ No answer

All types for H would work (XOR, AND, OR) as H is synchronized/merged by the OR-join D.

F is a loop exit and, thus, must be an XOR-split.

☐ No answer

Please specify your gender:

☐ female ☐ male ☐ diverse ☐ no answer

Please specify your age (in years):

Please indicate your current degree program:

☐ Bachelor of Science ☐ Other ☐ No answer
☐ Master of Science

If applicable, please indicate the course of your undergraduate studies:

☐ Computer Science ☐ Business Informatics ☐ Other
☐ Economics ☐ No answer

Your motivation and attitudes (*1=not at all true of me ... 7=very true of me*)

1 2 3 4 5 6 7 n/a

In this lecture, I learned a great deal.

☐ No answer

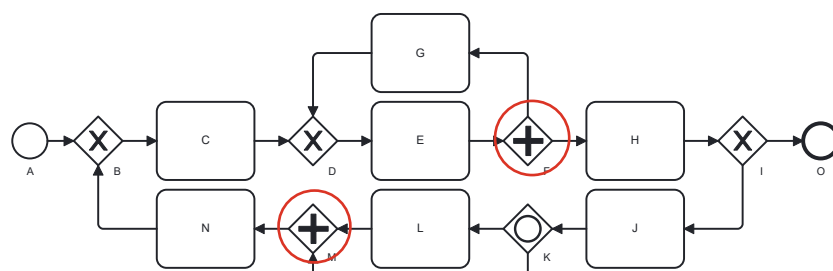

☐ This process model is sound.

☐ No answer

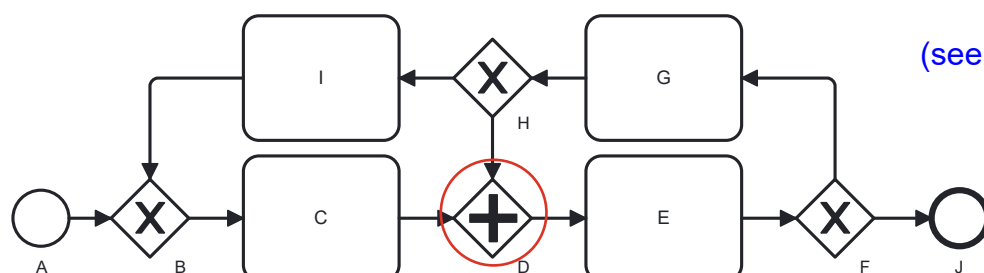

☐ This process model is sound.

☐ No answer

☐ This process model is sound.

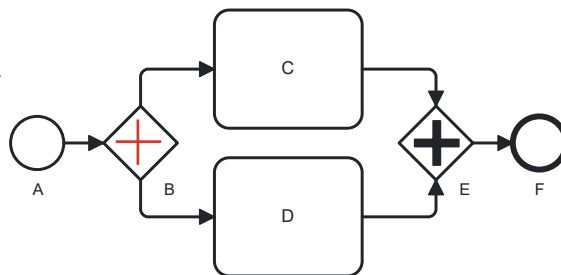

☐ No answer

☐ This process model is sound.

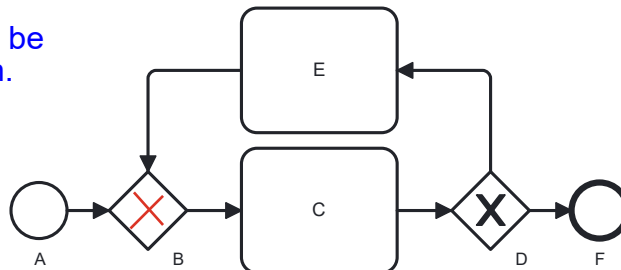

☐ No answer

There is the AND-join E, which requires a triggering flow (A,B). Only an AND-split B can trigger all incoming flows of E.

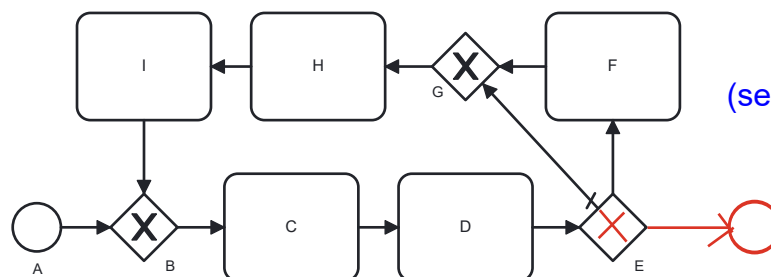

☐ No answer

B is a loop entry. Thus, it can be either an XOR-join or OR-join.

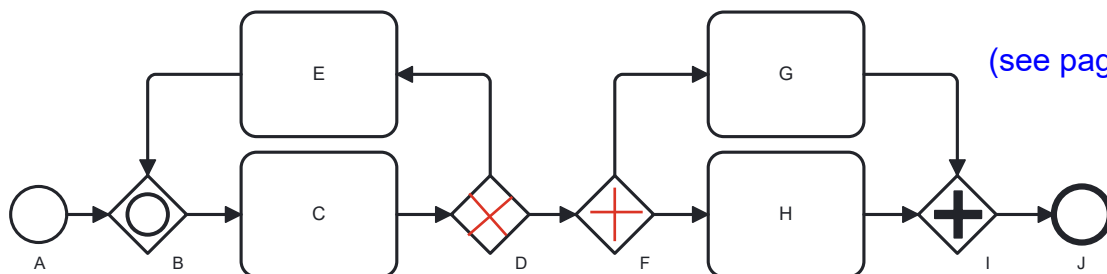

☐ No answer
